WORK EXPERIENCE

WordPress Developer | Techwala IT Consultant LLP   July 2023 - July2024

● WordPress Developer at Techwala IT Consultant for 1 year.
● Developed and maintained custom WordPress websites for clients, focusing on responsive design, SEO optimization, and user experience.
● Proficient in WordPress, Elementor, HTML, CSS, JavaScript, JQuery, SQL, PostgresSQL, NodeJS, ExpressJS, ReactJS, GitHub and scalable sites.
● Delivered high-quality websites on time, contributing to client satisfaction and business growth.
● Expertise in theme customization, plugin integration, performance optimization, and cross-browser compatibility.

PROJECTS

IIIHM | [LINK]

● Developed IIIHM, an educational website for an institution focused on hospitality management.
● As the lead developer, I built the site using WordPress, focusing on creating an intuitive and user-friendly interface.
● The website includes course details, faculty information, student resources, and contact forms, ensuring easy navigation.
● Utilized WordPress, Elementor, and custom themes to ensure a responsive, visually appealing design.
● The site significantly improved the institution's online visibility and student engagement.

CAG SCHOOL | [LINK]

● Developed CAG School, an educational website for a local school.
● As the lead developer, I built the site using WordPress to ensure a seamless, user-friendly experience.
● Focused on designing a clean layout with sections for school information, admissions, events, and contact forms.
● Utilized WordPress, Elementor, and custom themes to create a responsive and modern website.
● The website enhanced the school's online presence, providing easy access to information for students and parents.

THE CAG COLLEGE | [LINK]

● Developed The CAG College, an educational website for a higher education institution.
● As the lead developer, I built the website using WordPress, ensuring a responsive and user-friendly experience.
● Focused on clean design with sections for courses, admissions, faculty profiles, and contact information.
● Utilized WordPress, Elementor, and custom themes for a modern and mobile-optimized website.
● The website improved the college's online visibility and provided prospective students with easy access to essential information.

VIONESSE E-COMMERCE | [LINK]

● Developed VIONESSE, an e-commerce website for a fashion brand.
● As the lead developer, I built the site using WordPress and WooCommerce to create a seamless shopping experience.
● Focused on an elegant and user-friendly design with product listings, secure checkout, and payment integrations.
● Utilized WordPress, WooCommerce, Elementor, and custom themes for a fully responsive site.
● Successfully launched the site, improving online sales and customer engagement for the brand.

DIGITAL ERA | LINK | [GITHUB LINK](GITHUB-LINK)

- Developed Digital Era, a digital marketing website to showcase my skills and services.
- Built the entire website from scratch as a personal project.
- Used HTML, CSS, JavaScript, jQuery, and GSAP for animations and dynamic interactions.
- Focused on a modern, clean design with interactive elements, smooth transitions, and responsive layout.
- The website effectively demonstrates my web development and digital marketing expertise, offering visitors an engaging experience.

NIKE | LINK | [GITHUB LINK](GITHUB-LINK)

- NIKE is a custom-coded shoe showcase website, focused on creating a modern banner UI.
- Developed as a personal project to practice and demonstrate UI skills using ReactJS.
- Built entirely using ReactJS, emphasizing component-based structure and reusability.
- Implemented smooth transitions and clean layouts to enhance user experience.
- Successfully created a visually appealing UI, showcasing front-end development skills with ReactJS.

GUITARIST | LINK | [GITHUB LINK](GITHUB-LINK)

- Developed GUITARIST, a personal portfolio website to showcase my music and musical journey.
- Built the website from scratch as a personal project to highlight my music, skills, and performances.
- Utilized HTML and CSS to create a simple yet effective design for the website.
- Designed an aesthetically pleasing and easy-to-navigate layout with responsive features.
- The website effectively displays my music portfolio, providing visitors with a professional and engaging experience.

CERTIFICATION

Full Stack Web Development Bootcamp - Udemy   **May 2025**

- Learned HTML, CSS, JavaScript, and jQuery to build responsive and interactive user interfaces.
- Gained hands-on experience with NodeJS and ExpressJS for creating server-side applications.
- Studied SQL and PostgreSQL for managing relational databases.
- Built dynamic UI using ReactJS and learned component-based architecture.
- Used Git and GitHub for source code management and collaboration.
- Acquired practical skills to build full-stack web applications from scratch.

KEY ACHIEVEMENT

Successfully completed more than 10 client projects, delivering advanced WordPress solutions on time, even under tight deadlines
